

# Goldair™

PLATINUM

## Operating Instructions

### Electronic Inverter Panel with WiFi

Model: GPPH710, GPPH720, GPPH730

# Wifi – Downloading and Setting up APP

**This APP is supported only on 2.4GHz Wifi channels.**

**The Goldair app and device pairing process require your 2.4ghz connection to be separated from your 5ghz connection. For instructions on how to do this please contact your internet provider.**

Please note, we endeavour to keep our app up to date as devices and software continue to adapt and evolve. However, with ever changing technology and software we cannot guarantee as models age that their Wifi operation will continue to be supported. If you feel like the day-to-day functionality of your app is impacted, please contact our customer services team.

## Download Goldair mobile APP

- Open the APP Store or Google Play on your mobile phone.
- Open 'Search' and enter 'Goldair'
- Click 'GET' and begin to download and install.

Once downloaded to your phone open the APP

- Tap REGISTER near the bottom of the screen.
- Read and agree to the Privacy Policy.
- Add your email address.
- Tap 'Obtain verification code'

You will then receive an email with a verification code.

- Enter the verification code from your email.
- Create a password.
- Then tap confirm.

If you haven't received a verification code via email, tap the resend button and when the verification code is received follow above steps.

Your APP is now registered and ready for pairing to your device.

# Pairing APP to Device

## Connect with 2.4ghz Wifi Network

On the Home screen, tap 'Add Device' or the '+' icon.

Using the categories on the left, navigate to your device and tap on the image.

Confirm you are connected to a 2.4ghz network. If your 2.4ghz and 5ghz networks are dual banded, click 'Common router setting method' on how to split, or contact your internet provider.

# Pairing APP to Device

## Connect with 2.4ghz Wifi Network: EZ Mode

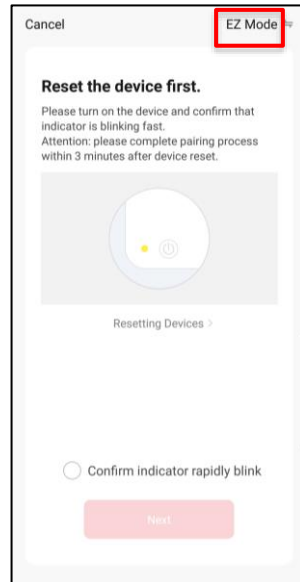

See instructions below to finalise your device pairing via EZ mode.

The app will default to EZ Mode in the right hand corner.

Ensure your device's Wifi LED is flashing rapidly.

If it is not, hold down the 'Wifi' button for 5 seconds or until the Wifi icon begins to flash.

Click 'Confirm indicator rapidly blink' and 'Next'

Your device will now pair with the app.

Please ensure your device, modem and phone are as close together as possible and that your 2.4ghz Wifi signal is strong.

Once the device has paired, choose  to rename it by tapping the Pen icon

Choose the most suitable room type and click 'Done' in the top right hand corner.

# Pairing APP to Device

## Connect with 2.4ghz Wifi Network: AP Mode

See instructions below to finalise your device pairing via AP Mode.

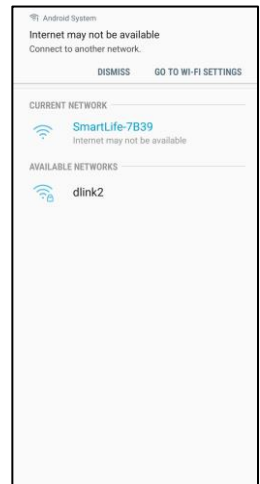

Change 'EZ Mode' to 'AP Mode' by clicking in the top right hand corner  
Ensure your device's Wifi LED is flashing slowly.

If it is not, hold down the 'Wifi' button for 5 seconds or until the Wifi icon begins to flash.

Click 'Confirm indicator slowly blink' and 'Next'

Click 'Go Connect' to connect to the device's Hotspot by selecting the network highlighted on the screen in your app, e.g. 'SmartLife- XXXX'

Select the device's Hotspot network and you will be returned to the app. If not, navigate back to the Goldair app.

Note- if you get a notification saying 'Internet may not be available' press Dismiss.

Your device will now pair with the app.

Please ensure your device, modem and phone are as close together as possible.

Once the device has paired, choose to rename it by tapping the Pen icon

Choose the most suitable room type and click 'Done' in the top right hand corner.

# Operating your Device from the APP

If the phone interface color is dark red, this indicates that the heater is in the OFF standby setting.

- Tap the OFF icon and the heater will turn on.  
**The display will change to bright red.**
- You can now control the heater.
- To turn the heater off again tap the power icon and the heater will revert to the dark screen.

Dark Red – Heater Off

Bright Red – Heater On

## TEMPERATURE SETTING:

- Tap the "+" or "-" button to set the temperature.
- When the set temperature is higher than the ambient temperature, the heater begins to heat.
- If the heater temperature setting is below ambient temperature the heater will be in standby mode and will not operate until the ambient temperature drops below the set temperature.

Depending on which mode you are in you can set the temperature as below.

Comfort mode can be set from 5 – 35°C

Economy mode can be set from 5 - 31°C

(this is pre-set so there is always a 4°C difference between Comfort and Economy settings)

## LED Display Icon

Tap this icon to turn off the LED display on the heater. This does not affect the operation of the heater.

To turn the heater display back on, tap the icon again

# Operating your Device from the APP

## MODE

Mode can be set to Comfort, Eco or Anti-frost.

Set your desired temperature in Comfort or Eco modes by pressing "+" or "-" buttons.

The screen will display which mode has been selected and the current set temperature and ambient temperature.

Comfort mode can be set from 5 – 35°C

Economy mode can be set from 5 - 31°C

(this is pre-set so there is always a 4°C difference between Comfort and Economy settings)

Anti-frost mode is pre-set at 5°C and cannot be adjusted.

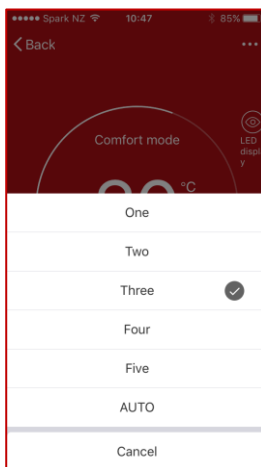

## HEAT SETTINGS

In USER, you can set the heat settings from ONE (lowest) to FIVE (highest) and the set level will be shown on the bottom of the APP.

It will also show on the heater display.

In AUTO, the heater will adjust the heat settings automatically to suit the amount of power required to reach and then maintain the set temperature.

## CHILD LOCK

Tap the padlock icon to display the closed padlock and "ON", indicating that the child lock is active. Tap the padlock icon again to unlock the child lock. You can adjust the heater settings with your mobile phone without having to unlock the child lock.

If you want to adjust the heater using the heater controls then you must first press the heaters press both the UP and DOWN   buttons together for 3 seconds or tap the padlock button on the APP to unlock it.

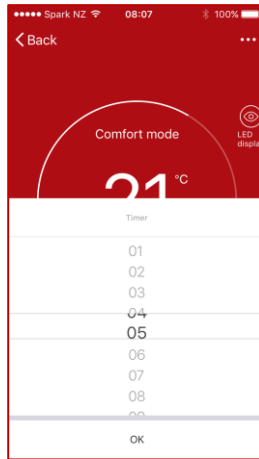

# Operating your Device from the APP

## AUTO OFF TIMER

When the heater is ON you can set it to turn OFF after a number of hours (1-24 hours) has elapsed.

- In the APP, tap the heater to be operated and enter the operation interface.
- With the power icon on the lower left corner of the mobile phone interface is displaying ON and the heater is turned ON.
- Tap the timer button and scroll to select the number of hours before the heater will turn OFF and tap OK to return to the heater operation interface.
- The timer icon on the lower right will display how long before the timer will turn the heater OFF.

To cancel the timer, touch the timer button again and the numbers will disappear and just show timer.

# Set up Tap-To-Run & Create Smart Scenes

Store your favourite settings or set up automated functions based on conditions in the 'Smart' part of your Goldair app.

**Warning- you must remember to turn off any Smart functions prior to leaving the house or going away. We recommend you only operate your Goldair devices when someone is on the premises.**

- Tap 'Smart' on the bottom of your mobile phone.
- Tap 'Create Scene' or the '+' icon on the top right.

Click 'Launch Tap-to-Run' to save your preferred settings on your devices to launch at the click of a button. Click 'Run the device' and choose a device. Preset your desired functions such as Power ON/OFF, temperature, mode and timer as per on the device's functions. Click 'Next'

Review your conditions and tasks on this screen, or choose to add another device or task by clicking the '+' icon.

Click Save to store your settings and your new task will appear on the Smart homepage. Click it to operate your desired task.

# Set up Tap-To-Run & Create Smart Scenes

As well as setting up automated Tap-to-Run tasks, you can set conditions to operate your devices.

## Weather:

Click 'When weather changes' to create a task based on your local outside weather. Choose between temperature, humidity, weather type, sunset/sunrise or wind speed. Select your desired condition and click 'Next'. Click 'Run the device' and choose a device. Preset your desired functions such as Power ON/OFF, temperature, mode and timer as per on the device's functions. Click 'Next'. Review your conditions and click save. Your automation will appear on the main Smart homepage.

## Schedule:

Click 'Schedule' to create a task for your device at selected times of the day. Click 'Repeat' to choose days of the week or leave as 'Once' to operate as a one off. Choose your desired time from the scroll bar and click 'Next'. Click 'Run the device' and choose a device. Preset your desired functions such as Power ON/OFF, temperature, mode and timer as per on the device's functions. Click 'Next'. Review your conditions and click save. Your automation will appear on the main Smart homepage.

## Status Change

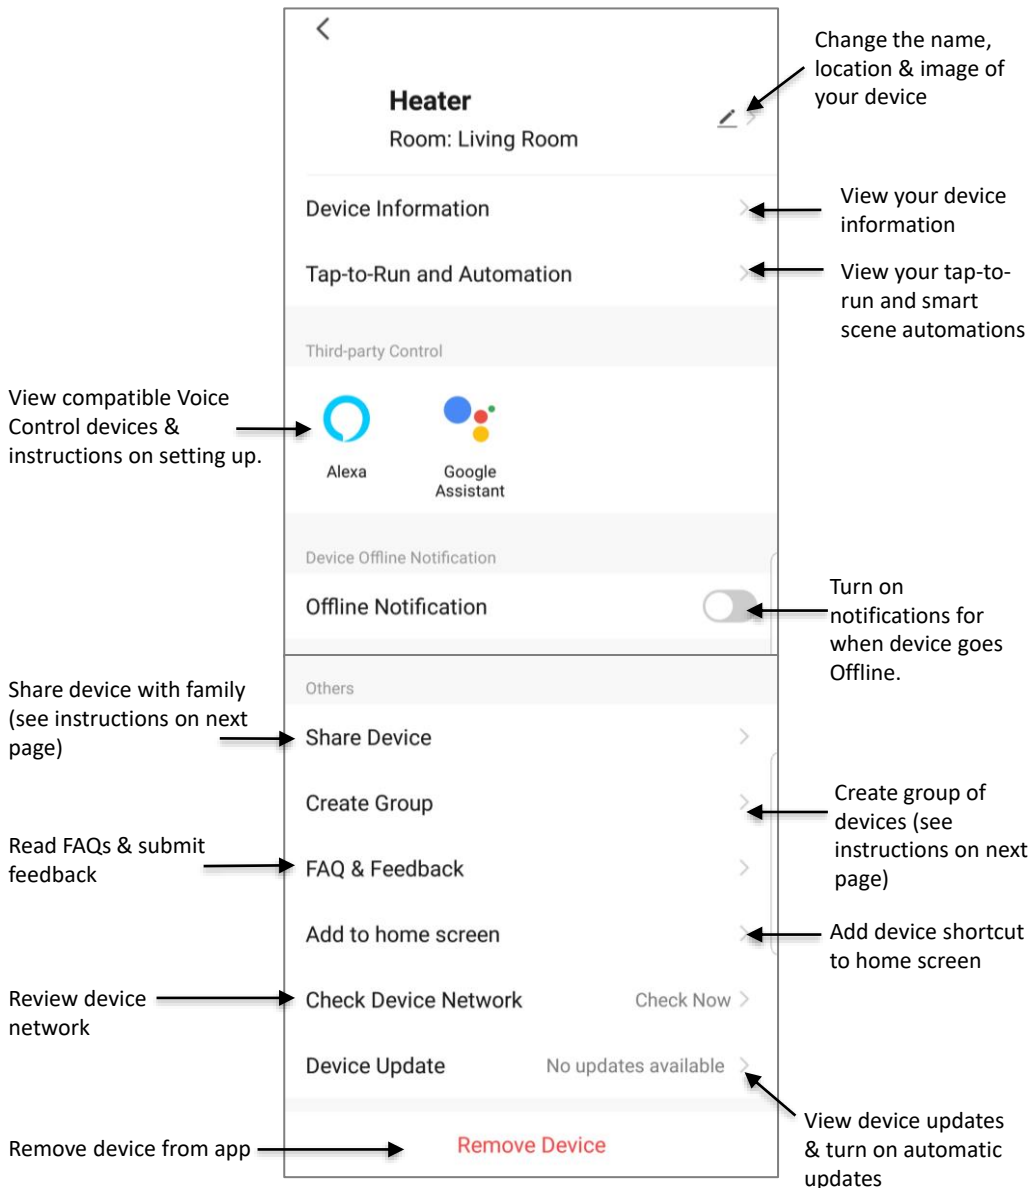

Click 'When device status changes' to create a condition based on any function on your device, for example turning the Power Off when any device function is changed (to act as a child lock)

## Voice Control

Once your smart scenes are set up, you can use Amazon Alexa or Google Home Routines to operate the scenes via voice control. Refer to your Amazon or Google Home user guides for instructions on how to pair your routine to smart scenes.

# Operating your Device from the APP

## Device settings:

# Operating your Device from the APP

## Share device with family member:

- The person you add will need to have the Goldair APP installed on their phone.
- Enter your family member's details to share device operation with them.
- Tap 'Confirm' to complete the addition.

## Remove family member from device:

- Tap 'Share Devices' to delete the number of the person you want to cancel. Tap 'Confirm' to confirm.

**NOTE: There can only be one user operating the device at a time. The APP needs to be closed on all other devices to enable the sharing to work.**

**NOTE: If someone else sets up their phone on the same device without using the 'Device Sharing' the original phone will be disconnected and the device will disappear from the device list.**

Family members can control the device

Country/Region **New Zealand**

Account

Set as administrator ☐

Once added, you can sign in to family with accounts registered with that phone number. The family administrator is granted all access, including removing the entire family. Regular members can only operate scenes and devices, they are not allowed to add and remove.

## Group your devices:

Devices within the same group can be controlled simultaneously

- Under 'Create Group' setting, select all devices you wish to group together. Click 'Save'
- Enter a group name of choice. Click Save.

You can now operate all devices within this group simultaneously.

**Select Device** Save
